To whom it may concern,

Compass Minerals Sifto #4 Coarse and #8 Coarse Salts are single ingredient products. They are made by running food grade salt through a compaction process to increase the size of the salt particles. While Compass Minerals' Hygrade Food Grade Salt is certified to the BRC Standard, the compactor is outside the scope of the GFSI audit. Therefore, the #4 and #8 salts are food grade salts, but are not 3rd party audited for GFSI compliance.

These salt products meet all regulatory requirements as specified in Safe Food for Canadians Regulations, Food and Drug Act and Food and Drug Regulations. They are therefore appropriate for use as ingredients and processing aids in food manufacturing facilities.

Please feel free to contact me if you have any additional questions.

Kind regards,

A handwritten signature in blue ink, appearing to read "JL Welsh", with a long horizontal flourish extending to the right.
